Mines and Prospects-Furnaces and Mills

DIXIE PROPERTY A GOOD LOOKER

Tribune Correspondent Visits Mine.

Comprehensive Statement of Conditions Is Made From Unbiased Standpoint.

Other Promising Properties Are the Denver and Eclipse Groups, in Bullfrog District.

BY STAFF CORRESPONDENT.

Special to The Tribune. GOLDFIELD, Nev., May 8.-Through the kindness of President Mayfield and Vice-President Clark of the Dixie mine The Tribuna representative was given every opportunity to inspect that property and to make a thorough examination of the workings that have been carried on upon an extensive scale for some time. The Dixie property is composed of four full claims and a fraction, altogether about eighty acres, situated three miles east of Goldfield, and was purchased by its present owners last October. There extends across this group of claims a huge outcroppings of quartz and porphyry that can be traced quite easily on and through the Jumbo claim, quite a distance away.

Two-Hundred-Foot Shaft.

Lipon this outcropping, where values were found to the extent that justified the purchase, a shaft has been sunk to a depth of 225 feet.

At seventy feet extensive cross-cutting has exposed a fine vein of a known width of eighteen feet, a very probable continuation to the south and a known existence as to length for some distance further east.

It is the plan to sink a hundred feet

ther east.

It is the plan to sink a hundred feet further in this main shaft, when it is calculated by the owners a sufficient supply of water will be found to supply the company's mill, which is now a certainty.

Good Milling Values.

This vein carries good milling values, the formation is of a conglomerate na-ture and of an exceedingly free-milling character. The deeper workings show no shatement in the extent or value of the vein.

To the east of the main shaft one hundred feet, a tunnel was driven along the veln, over a hundred feet in extent, an incline shaft of sixty perpendicular feet, from which a cross-cut extends north another sixty feet, shows identically the same vein and ore. It is intended by Superintendent Mike Hennessey to sink a shaft so as to connect at this point. All indications point to the showing here as being merely a continuation of the main shaft vein. Should this prove to be the case the contemplated shaft will assume the dignity of the main shaft, and the mill will be located at this point.

Confidence Justified.

Confidence Justified.

The great mass of milling ore aircady exposed fully justifies the confidence that the company reposes in their mine. All through the several hundred feet of shafts and tunnels the ore vein has preserved the excellent character.

and tunnels the ore veln has preserved its excellent character and values. The showing made would fully justify the building of a mill soon as the requisite supply of water is secured.

Numerous samplings have been made and assays have run to most any value from \$30 to \$250. The management states that assays of \$400 to \$500 are not unusual. The amount of ore in sight is a guaranty of the permanence of the mine, and iberal examinations have convinced the Goldfield people generally that the Dixle is "a comer.

The company has not pursued the leasing policy, but it has done, and will do, the entire development of the property.

TWO GOOD PROPERTIES.

Denver and Eclipse Groups at Bullfrog Contain Great Riches.

Special to The Tribune.

GOLDFIELD, Nev., May 8 -Reports of

the vast richness of the Bulifrog district keep multiplying fast as those who has-tened there during the stampede are re-

terning.

The latest fine showing comes from the Denver and Eclipse groups. A force of men on the former have exposed two fissure vetus six feet and over wide, with assays running \$250 in gold. The company is sacking ore preparatory to ship-

pany is saled by the Eclipse group on ping.

The Benver joins the Eclipse group on one end, and on the other the Tramp No. 1 and Tramp Extension Exposed ore in great quantities shows shipping values. The bond has been taken up on this group by Messrs. Oddle, Winslow, Davis and Aldrich

Aidrich. Aldrich. The Eclipse group of claims has five distinct veins that parallel the entire property of 100 acres.

Going Deep After Ore.

Going Deep After Ore.

A shaft has been sunk on the El Tigre claim to a depth of eighty feet, and it is the plan to extend this shart forty feet further, to the point where all indications show a similar proposition will prevail as on the Denver and the Tramps. These ledges, which are from 125 to 150 feet wide, have been sampled and show average assays of 115 a ton.

T. L. Oddle has purchased the controlling interest of the ownerehing stock, and will place the same with the Eastern capitalists who were identified with the great Tomopah properties.

Halists who were identified with the great Tonopain properties.

Mr. Oddje has just returned from Bull-frog and freely predicts that in three months the Bullfrog Eclipse group of claims will develop into record-breakers if not world beaters.

Faith Well Founded

In the face of such showings made near the property, such as the Montgomery-Shoshone and the Mountgomery Mountain claims, Mr. Oddie's confidence in the Eclipse should show the broadness of his faith in the property.

Calina, Mr. Usade's confidence in the Eclipse should show the broadness of his faith in the property.

As an evidence of the faith of others, it is related that United States Senator George Nixon has placed a big order for stock in the Eclipse.

The Builfrog Western property is also showing values that have strengthened the owner's faith as no theory or favorable comparison could.

At a depth of six feet on the ledge a four-foot vein is exposed which has assayed as high as \$150. The same general characteristics prevail on this property as on the pay shoot of the original Builfrog. This group is composed of seven claims, three of which are situated 1500 feet west of the original Builfrog mine.

Nevada Nuggets.

The Montgomery Mountain Mining com-pany, whose property occupies the entire McCornick block.

DAY ON 'CHANGE.

Bilver Shield Starts Up and Leaves Talent at the Post.

The week on the mining exchange opened on the sale of 40,555 shares of stock for \$14,904.25 and with the tone of the market generally firm, notwithstand-ing the spankings that were administered ing the spankings that were administered at intervals. Silver Shield, with which the bears had been having not a little sport, did some sprinting, indeed, and closed on an advance of 12 cents a share, while Con Morcour touened a half-dollar, after many weary moons, with Uncle Sam moving up to 42½ cents and then settling back to 40 cents. New York took hold of the bits and advanced to 73 cents, after which it receded to 71 cents, while Yankee Conclosed on a transfer at 36 cents, with Mammoth bringing 813 on a report that its forces had been notified to get ready to renew the bombardment below. Lower Mammoth zecommodated a customer at 23 cents and Century another at 15 cents, while Tetro, under heavy selling orders, was reduced to 20 cents, with May Day closing on a transaction at 20½ cents. Box ton Con parted with a single lot at \$3.15, with Wabash changing hands at \$1.70, the day closing on the following market:

half of the Montgomery mountain, in south haif of the Montgomery mountain, in the Builfrog district, has purchased the Bell-boy fraction adjoining its Rlack Buil claims in the southeast. This is regarded as a valuable addition to the property owned by the company. Sol Camp has resigned as super-infendent of the January nine to take charge of the company's property. Development work on quite a large scale has been done on this property. A tunnol, the site for which was located by John McKane a noted mining surveyor, J. D. Campbell, is being dirived into the side of the mountain with all possible speed. At air feet a rich streak has already been encountered, atthough it is not believed that the Shoshone ledge will be uncovered within 199 feet.

Mrs. Frank Lathrop, who has been visit-ing her husband here, has returned to Salt Lake.

J. M. Bennett, formerly general passenger agent for the Donver & Rio Grande railroad, has arrived in Goldfield.

Clayton Thatcher of Salt Lake is in camp, to become a number of D. H. Peery's book-keeping staff. Mr. Peery is expecting a corpa of type-writers from Salt Lake and San Francisco before the end of the week.

W. H. Cunningham, formerly of Salt Lake, at present manager of the Continental Life at San Francisco, arrived here today to take charge of one of Mr. Peery's departments.

Mr. Roy of Salt Lake, who is the general agent for the Redtop whisky, went to Rhysite a short time age and purchased two town lots for \$500. He was offered \$500 for them a few days later, but reduced to sell. He is now in Rhysilite and intends building on the

E. Dollimore of Ogden, who was interested in the prominent Zinn lease on the Jumb property, is here looking over his interests.

property, is here looking over his interests.

The Sharman Goldfield Mine commans, a corporation owned by Judge W. A. Sherman, Brown, Terry & Woodruff and others, has purchased for the sum of £0.000 the Sliver King group in the Kawich range. The deal conprises five full claims situated two miles from Italia Rod. Work will begin at once.

This company owns an undivided one-third interest in the Bulfrog Gold Bar Hazeltine group, which is one of the earliest discoveries at Bulfrog, also the Davis Interest in the Loftus and Davis Sandstorm mine, and a one-third interest in the Kruger leaze, from which they are now shipping ore. They have also purchased at Bulfrog the Magnetic group of the full claims, one-half mile west of the Hazeltine ground, for £2,000.

The Sassy Sal. located two miles west of town, is showing up well. The owners stated to The Tribune representative that the same general conditions are found as characterize such proporties as the Jumbo, January and Florence.

There are three shifts at work at present, and development will be diligently pushed forward to determine the actual value of the mine at the earliest opportunity. Surface indications of decomposed quartz showed assays of \$15 to \$49, while on the vein at forty feet ore running as high as 598 was encountered. From present indications the owners confidently expect to sack shipping ore within a short time.

Give your postmaster \$1.50 and have him send you The Sait Lake Tribune twice a week for one year.

Britannia Buys Ready-Made Plant

Completes Its Splendid Equipment With Acquisition of Smelter Constructed by Bellinger.

With his gigantle undertakings out o Vancouver, B. C., all moving toward at arly consummation and a speedy reimbursement of all interests, George H. Robinson has arrived from the north again, and after an inspection of the Tintie company's interests at Tintie and Bingham, will continue East to confer with Capt. Henry Stern and others, who are co-operating with him. Of the campaign of equipment at the properties of the Britannia company in the north, Manager Robinson says it is now well in hand, the big mill with which the second-class ores are to be converted into a high-grade product, while the first class is being forwarded direct to the furnaces of the smelter, to go into commission in July, as will also the long tramway over which the output of the copper, gold and silver-bearing mines shall be delivered to the bins upon Howe sound. During the absence of Mr. Robinson, accompanied by other officials of the company, a deal was consummated in which the company acquires the smelter formerly operated by Herman C. Bellinger at Crofton, B. C. and whose methods are perfectly adapted to the ores and concentrates of which the Britannia's mill and mines shall soon be made actively productive. With this acquisition upon which the company and the management are to be congratulated, much time is saved for it and will enable the management to begin at once the fires are started, the production of pig copper and the piling up profits.

Mr. Robinson returns to find the plant and properties at Bingham responding to the needs of the metallic world, the mines operated by his company in that camp, among the largest in the West. Indeed everything in this State, as well as the north is at present favorable to all to which the management has looked forward, nor can the period of active reimbursement be remote. bursement of all interests, George H Robinson has arrived from the north

YUBA EAST STRIKE.

Development the Sensation of the Day in Old Camp.

Tony Jacobson, who as a superintendent of the Godbe interests at Ploche, Nev. acquired an enviable knowledge of that old camp of bonanzas, came in from the West during the day, expressing not a lit-West during the day, expressing not a little surprise and sincere gratification at the activities upon which the season has opened there. The discovery made by Lloyd & Cook on the East Yuba and the rich ores that are responding, is easily the sensation of the day at camp, and Mr. Jacobson has positive assurance that from ores broken down in each foot of the drift, as much at \$90 is being earned. The ore, indeed, is reminiscent of a period when fortunes were being piled up by the Ploche miner. While he is negotiating for property in the camp, Mr. Jacobson would not divulge the name of the properties about which he has fastened his grip, nor will he until his object has been consummated.

Boston Market Quiet.

tom - Tonopah

Special to The Tribune. Special to The Tribune.

BOSTON, May 8.—A very quiet market in Boston today, with prices inclined to side off a little. Commission houses were inclined to sell stocks where a market was found, but the trading was very light. Traders were not inclined to operate and the market, left to itself, became groggy. Price chappes among the shares were fractional, but at the expense of values. Closing was quiet. Hornblower & Weeks, brokers, 53 State street, Boston, and 10 Wall street, New York, furnish the following quotations:

Sales, High, Low, Close.

Sales, High, Low Close, 3,775 \$80,1246 \$78,874, \$79,75 Amalgamated 3,775 \$30,12\(\frac{1}{2}\) \$78 \$71\(\frac{1}{2}\) \$79,75 Bingham 200 31,00 30,25 Daly West 45 13.00 Mercur 1,839 6.50 Utah 1,116 42,75 42,62\(\frac{1}{2}\) United States 1,278 31.00 50.50 30.75 Curb—Boston, \$8,00\(\frac{1}{2}\)\$9,00\(\frac{1}{2}\)\$9,00\

Ore and Bullion. The day's settlements in the ore and buillon market amounted to \$57,800 Mc-Cornick & Co. reporting them as follows: Buillon, \$12,300; gold, silver, lead and copper ores, \$25,500.

In the metal market silver ruled at \$75% cents an ounce, lead at \$3,50%4.50 per hundred pounds, and casting copper at 151% cents a pound.

HONERINE TUNNEL.

Excellent Progress Being Made From Two Headings

Of the long tunnel by which the Hon have been unwatered, and through which its wealth of ore will soon begin to beich its wealth of ore will soon begin to belch, as many as 7700 feet has now been completed, said Superintendent E. J. Raddatz during the day, and to expedite work on the remainder blasting is going ahead on the face from the mines. On the main section he is now advancing at the rate of seventy-five feet per week, while shooting his way through fifty feet of earth on the upper one. At the mill tests are now being made that the management may be permitted to classify its product in future as is desired at the smelter furnaces, and with this good progress is being made. Superintendent Raddatz leaves for camp again this morning.

The East Digs Up for Utah Interests

Salt Lake Mining Man and Broker Returns With Sinews for Big Development.

With substantial reassurance that in he East there is always a glad hand for the meritorious, and with just a slight preference for the proposition from this State, Mr. William H. Tibbals came in from Boston and other of its cities yesterday morning prepared to prosecute a campaign of increased activity upon all of his undertakings. In Boston and among the investors of that and neighboring zones, he found the list of "coppers" from this State undoubtedly the most popular of those that are claiming attention, and many of them in the vaults of entire New England. The interest in securities that have gone from Bingham and Park City, from Thitie, Aita and Beaver county, has never been more pronounced. Of several of the Bingham's New York has been a very eager buyer, and while the more active of those who have been engaging in these purchassis deny that it is possessed of significance other than that attaching to an investment which promises, if it is not at present productive of big returns, there is an impression that the stalwarts are looking forward to an hour when Bingham shall be made the arena for an amalgamation as gigantic as that for which Montana was chosen several years ago. Under this impression the shares are being snapped up as they are offered and New York is at present a very heavy holder of the list. During his absence Mr. Tibbals succeeded in interesting the investor in the properties of the Frisco Contact Mining company with its output of \$40,000,000 or more, and with them placed such interests as shall enable the management to consummate its plans and get down into the one bodies that await it upon the extension of the Horn Silver, and in which direction work is now actively progressing. With his experiences and the result of his pilgrimage throughout Mr. Tibbals returned very much pleased. State, Mr. William H. Tibbuls came in from Boston and other of its cities yesdirection work is now actively progress-ing. With his experiences and the result of his pilgrimage throughout Mr. Tibbals returned very much pleased.

Pioche's Population Seeing Some Activity Ahead of Them.

PREPARING TO MOVE.

Reports have reached Pioche from New York to the effect that affairs pertaining to the Nevada-Utah Mining company are nearing completion and that work will be commenced about the latter part of July, says the Record of Ploche, Nev. The Nevada-Utah wants no mines but what have merit, and all properties not possessing this qualification will be stricken from the bond. Valueless mining property put in at big figures will not "go."

William B. Mucklow of Hartford, Conn., arrived in Ploche on Sunday evening and on Monday E. F. Freudenthal took him to Bristoi to look at mining property in which both are interested.

On Sunday six four-horse teams came in loaded with material for the Abe Lincoin mill and most of the supplies for the leaching department are now on the ground. Mr Holderman, the head of the Holderman Filtering company, has been ground Mr Holderman, the head of the Holderman Filtering company, has been here for the last week and is personally superintending the crection of the tanks and all matters connected with the flitering department. It is expected, the weather permitting, to have this department completed by the 15th of the month when tests will be made. The pipe has been placed in the mine for the compressor, which is now in position, and everything in connection with the plant will be in running order by the first of the month, barring unforseen accidents which are liable to all newly-constructed plants.

THE CORY BONANZA

Ores Estimated at \$4,000,000 Blocked Out in the Mines. W. G. Nebeker, who has been making

study of conditions in Old Mexico while ecking to improve his health, came up from that Republic again yesterday and is again fitted for his expert labors in the field. While the country has many commendable properties on its pegs, it is commendable properties on its pegs. It is extremely difficult to negotiate for them said he, as an admission is generally required of those who have come to inspect. Indeed, there are few bargains on these pegs, to which the promoter has not added \$100.000 or correspondingly, before the investor gets to it, and the result is that the hunting down there has been made difficult. Of the Slavia d'Oro mines, for which Harry Cory. Robert J. Coleman and associates, obligated themselves to pay \$2.00,000, it is said that the management has ores of the value of \$4.000,000 blocked out, and everything indicates, said Mr. Nebeker, that they have acquired a big thing. He returns with his health much improved and prepared to renew his labors as a mining engineer.

Now Behave; Will You!

Now Behave; Will You!

Latest reports from the New York are as encouraging as ever and the mine is looking better and better each day, says the Record of Park City. The ore in the west drift on the 500 has widened out considerably and on the 500 has widened out took is very encouraging. There is no truth in the report that a water course had been encountered, as the levels as dry as ever they were. The slump in the stock during the week was due entirely to the unscrupulous 'knockers' who delight in finding fault and circulating malicious lies. These same men pretend to be friends of the management, yet they lay awake nights concocting schemes to injure the property. Hereafter there will be fewer visitors allowed in the mine, and the 'wiscacres' will thus be prevented from pedding their knowledge (?) of the condition of the mine to the broker sharks of Salt Lake for mercenary purposes.

The small shift which has been working at the Nalidriver for some months past was haid off this week, and the mine is now completely shut down. How long it will remain so is only a matter of conjecture, though the management has given out information to the effect that work will be resumed there on a large scale this summer.

Say It Is Agricultural.

The combat between Herman Pembroke and the Union Pacific railway over mineral locations in section 19. Morgan county, this State, is in progress before the local register and receiver. The Union Pacific, by which the petitioner's application for patent is being protested, contends that the ground in dispute is agricultural and not mineral-bearing. The issue is being followed with much interest by the neighbors.

The Sevier Con. Opens New Ledge

Another Channel of Gold-Bearing Or Tapped in Properties in the Southern Country.

With the gold-bearing properties of the Sevier Con. company on Gold Mountain ready to respond with 150 tons of ore laily and a brand new channel of goldbearing rock to certify to his efficiency as a miner, Henry Jones, who has been serving the company as its superintendent, came up from the south again yesterday to devote himself to local interests. For some time the company has appreciated that to accompilish its ambitions and to place the Sevier among those from which dividends are flowing, it was necessary to entarge the mill, and to meet that requirement it is the intention to place orders for additional equipment at once. The plant has been recovering the values from an #srage of fifty tons of ore daily, the rock maintaining an average of \$15 per ton. To add to its resources Superintendent Jones, a few days ago, made the discovery of a new ledge for which he had been cross-cutting the country from the No. 5 level, the ores in this showing an average of \$1.50 per ton, and occurring at a depth of 469 feet, and with everything to indicate that they continue through the unexplored stretch of ground above, to the grass roots. It is upon the strike of this ledge that the management is now drifting in ore. Of the undertaking throughout, Mr. Jones, who has been connected with a number of the larger mines, says there is no doubt of its ultimate production and that in the same locality are a number of other likely properties, conspicuous among these the Surprise and Holland, that should soon be added to the list of bread-earners.

An opportunity to make good money. erving the company as its superintend-

that should soon be added to the list of bread-carners.

An opportunity to make good money, says Mr Jones, awaits the man who establishes a power plant at Sevier station, that the miners may be supplied along custom lines. It will also do much to stimulate development in the gold-bearing region and add largely to the output in a short time.

WORKING MANY MEN.

All Tunnels on Gold Development Interests Now Advancing.

special to The Tribune RICHFIELD, May 8.-Lorenzo Nielson ame down from the Franklin properties Wednesday. He says conditions become Wednesday. He says conditions become more encouraging as development continues. With the installation of the new machinery, which is in progress now at the property, the work of pushing the tunnels into the mountain will be greatly increased. A nice vein of ore has been encountered in the new tunnel which is being run on the Development company's ground.

encountered in the new tunnel which is being run on the Development company's ground.

The company has a large force of men at work now on the different reads, fixing them up so that heavy loads may be taken over them. With the increase of men at the different mines and on the roads throughout the district. Marysvale has taken new life, the camp seems to be on the boom and everybody is looking for something big to turn up in Marysvale this coming summer.

B. T. Ashby come down from Marysvale Wednesday and went to Sait Lake Friday to order some new machinery for the Aldebaran property, which he is working near Marysvale. The air has become so bad the last month that they are compelled to put in an air compressor to pump air into a shaft which they have been running. This will be purchased and shipped to the property at once, together with some other machinery. Mr. Ashby has been developing this property all winter, and until about a month account of the sir.

The new strike in the Bradburn property, near Belknap, is causing considerable talk among mining men, and those who have been examining it pronounce it a good strike. The new strike was made after following a streak of tale toward the line of the surface cropping. Max Krotki of this city and M. L. Burns of Salina made a trip over to Milford this week. They went to examine the Lenore mines, formerly known as the Miner's Dream. The property looks very promising. Several years ago some very rich ore was taken out; there has been

promising. Several years ago some very rich ore was taken out; there has been a 100-foot shaft sunk by Mr. Burns, and he has come uton a lead carbonate ore of fair grade. This property lies between the Harrington-Hickory and the Hoosier, both owned by the Majestic people.

people.
The Signal Peak property, on Gold Mountain, has run into a stresk of running ground and of such amount it has compelled them to put on three shifts to keep it in check.

OIL CROWD CONTROLS.

Buys Freely of Utah Con., While Lawson Gets Busy.

As might be expected, copper shares suffered declines in keeping with the New York market Wednesday of last week was high day, and from that time the market has been a drooping one until today, when prices commenced to mend again, writes the Boston correspondent of the Engineering and Mining Journal. The weakening of copper is thought to be only temperary, and can hardly be ascribed as the reason for the short decline witnessed in some cases. At the present time there seems but little prospect of a good copper share market, but it may come from an unexperted source and without warning. Utah Consolidated has been conspicuous for one of its strength even in an otherwise heavy market. It is well supported at \$42.50, but from this it advanced steadily to \$45 closing \$1 better than a week ago, at \$44. Lawson covered a heavy short line at the first-named figure. It is now estimated that the so-called Standard Oli crowd own a majority of this stock, having accumulated about 50000 sharts recently was high day, and from that time the a majority of this stock, having accumulated about 50,000 shares recently.

OPENED UP TELLURIDES.

Sensational Discovery at Mines Superintended by Guenther.

A letter from James T. Fulton, embellished by samples of silvanite, during the day, tells the story of a most sensational disclosure in the properties of the Nattenal Gold and Silver Mining company at Stein's Pass, Ariz, and of which Richard Guenther of this city is sujeriniendent. Four feet of ore uncovered on the 200-foot level, showed under the free 265 ounces silver, with \$90 gold per ton, while a ten-inch streak, in which occurs the telluride, affords as much as 1020 ounces silver, with \$350 gold per ton. On properties at El Rey which were acquired by Mr. Fulton some time ago, the condition has improved hourly, and a prominent Nevada investor has made the owner an offer for them. Mr. Fulton is quite enthusiastic over his acquisition and promises to return with a fortune. disclosure in the properties of the Na-

To Wait on Tunnel.

Having fathomed its ore-bearing channels at Stockton to a depth of 1000 feet, the management of the Galona King ming) has suspended active development until such time as the Honerine tunnel is made to afford its wealth an outlet. The extension of the tunnel will be under a joint arrangement between the companies.

company has returned from California, where with Hon Frank Bubl, one of the Eastern officials of the big organization, and Secretary C. O. Ellingwood, he inspected the Balaklala mines, upon which a smelter will probably be reared this year. Mr. Bubl, who was much pleased with his interests there, as well as in this commonwealth and Idaho, proceeded East, to be present at the annual meeting of Annie Laurie shareholders, which is scheduled to occur in Chicago today.

Up in the Canyon.

Special to The Tribune.

AMERICAN FORK, May 8.—The Capitol Gold and Silver Mining company, operating the Gold Blossom mine in the North Tintic district, has made another assessment of the a share, to continue operations. The company is very anxious to got its first shipments of ore on the market. The shareholders are very enthusiastic over the prospects of the mine and are prompt in the payments of assessments. Special to The Tribune.

ments

Harry J Krulse, superintendent of the
Bogg mine in American Fork canyon, has
returned to that property. Mr. Krulse is
very enthusiastic over the promising conditions of the mine and thinks the property will be one of the foremost.

George Summerville, manager of the
Blue Rock mine, operated by the Pache
Gold Mining and Milling company, will
return to that property tomorrow to continue work commenced last fail. The
property has a very promising appearance
with it and they expect to be able to put
the mine in a paying position during the
coming summer.

Manager Channing of the Utah Con. left for its Blingham mines yesterday morning. Z. F. Wheeler, owner of the Grand Prize nines and mill at Tuscarora, Nev., is in the ity, accompanied by George R. Sheldon, the agineer at his properties.

cagineer at his properties.

Cari S. Barker, the New York representative of the United States Investor, came in from the East during the day and is interviewing mine managers.

A report from Park City during the afternoon indicates that Manager Road of the Ontario has succeeded in getting through the first cave-in, and that he will now proceed without delay to determine the whereabouts of the second.

Cashler John Hays of the I'tah Copper com-puny yesterday settled for a three-car lot of high-grade copper concentrates from the mill in Binghum canyon, and has five more at the smelter.

Superintendent W. H. Nutting of the Bing-nam Cont. smelter reports the enjargement of he dust chamber at his plant completed, with our furnaces now is commission. Cashier Frank D. Kimball of McCornick & Co.'s branch bank at Eureka was a visitor from Tintic during the day and reports the output, as well as the payrolls, steadily increasing.

A consignment of ore from Lund Utah, which was marketed through the Taylor & Brunton sampler during the day, showed an average of \$4.7 per cent copper, with \$2 cunces of sliver, per Ion. The lot consisted of six

of silver, per Ion. The lot consisted of six tons.

President E. L. Whits of the Bingham Con. left for Montans yesterday, accompanied by J. J. Phelan, the field representative of the great house of Hornblower & Weeks, Boston I and Now York.

Manager Samuel Levy has returned after a hasty trip to Ogden, and will leave for the Annie Laurie mines and mill at Kimberly the last of the week.

J. C. Gladden, who is managing Nevada properties for Salt Lake interests, came in from the weet yesterday for a conference with them.

Much Pleased With the Condition of

Western Interests.

William H. Cunningham, for many years with the Con. Mercur and De Lamar interests in this State and Nevada, has accepted a position with the D. H. Perry company at Goldfield, Nev., and to report for duty left San Francisco Saturday night.
